## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
2. Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over

Jones et al (Jones hereinafter, US PAT NO.: 7,349,566) in view of Park et al (Park hereinafter, US PUB NO.: 2003/0225705).

Re claims 1, 2-29 and 31. Jones discloses a method for generating an e-check, the method comprising: scanning a check to create an image of the check in response to receiving a check as payment for a transaction (see col.8 line 60-col.9 line 65); entering an amount of currency represented by the check into a point of sale terminal (i.e., amount and payee, see col.10 line 59-60), identifying check information that describes a bank and a bank account, wherein the check comprises the check information (see col.16 lines 6-10). Jones does not explicitly disclose generating a negotiable instrument,

wherein the negotiable instrument comprises a check object based upon the image, the amount, and the check information, wherein further the check object includes the image. However, Park discloses generating a negotiable instrument, wherein the negotiable instrument comprises a check object based upon the image, the amount, and the check information, wherein further the check object includes the image (see the abstract, also paras 0015). Thus it would have been obvious to one of ordinary skill in the art at the time of the invention to include the teaching of generating a negotiable instrument as taught by Park in the system of Jones, since the claimed invention is merely a combination of old elements, and in the combination each element merely would have performed the same function as it did separately, and one of ordinary skill in the art would have recognized that the results of the combination were predictable.
